PERSONAL PROJECTS

Spam SMS Detection
- I build a user-friendly application capable of predicting whether an input SMS is spam or not using ML and Python.
- I implement a chatbot interface that assists in identifing and reporting spam messgaes.

Personal Portfolio
- Define purpose, sketch layout, create HTML/CSS structure, add content and style with CSS, make interactive with Javascript.

Food ordering Website
- Users can use this website for food ordering.
- in this we used technology like HTML, CSS and Javascript.
